PRAD

Marine & Offshore Engineering

Hello!

Shipbuilding Industry

The **PRAD Serwis Elektryczny** Company has been providing its services on the shipbuilding market for over 20 years. Our wide variety of electrical and installation services as well as the work associated with the prefabrication of finished structures allow us to carry out complete conversions or work in construction of new vessels.

The company has certificates of the **Polish Register of Shipping (PRS)** and **Bureau Veritas**.

Our company is a strategic subcontractor of **Remontowa Shipbuilding SA** in Gdańsk. We have there our second office, electrical and fitter's workshops. Our company was involved in repairing over 1000 vessels together with the assistance of the electrical department.

Our services and work are provided not only in Poland. Owing to our numerous contacts gained during tenders or owing to the references given by customers we can win contracts on the foreign maritime markets. Currently, we cooperate with over 20 partners and owing to such cooperation we carried out the work in the world's largest vessels such as the **Royal Caribbean, Carnival, BC ferries, Royal Arctic Lines** or **Maersk** container ships and specialist vessels.

In the Neptun Werft shipyard in Rostock our company has been involved in complete outfitting of 14 **Viking Lines** newly built river ships with electrical fittings including connections and commissioning (143 000 km of cables in one ship)

Our employees undergo special training to perform the work also on the platforms.

Owing to our acquired knowledge, skills and experience we are ready to take up new challenges.
